

AKSHIT PHONSA

✉ phonsaakshit@gmail.com ☎ +91 8899021122  LinkedIn  Github  Portfolio

Profile

Full Stack Developer skilled in Java, Spring Boot, React, and databases including MongoDB, MySQL, Neo4j, and Oracle. Developed RESTful APIs and microservices for high-traffic pharmacy applications at TCS, implementing concurrency controls, optimized SQL queries, and data integrity solutions. Built responsive websites with HTML, JavaScript, Material UI, and backend integrations. Engineered projects like iNotebook for efficient CRUD operations and secure authentication, and a LinkedIn clone featuring graph databases, Kafka notifications, and distributed security across services. Proficient in Docker, Git and Jira.

Education

Thapar Institute of Engineering and Technology
BTech, CSE (CGPA: 7.55)

Aug 2020 – Jun 2025
Patiala, Punjab

Technical Skills

Languages: C, HTML, Java, JavaScript

Frameworks: Vue.js, Spring, Spring Boot

Tools: Git, GitHub, GitLab, npm, Postman, Swagger, ELK Stack, VS Code, IntelliJ IDEA, Jira, Docker

Database: MongoDB, Oracle, MySQL, DB2, Neo4j, SQL

Professional Experience

Pinnacleway Biz Solutions
Full Stack Developer Intern

Jan 2024 – Jun 2024

- Developed and deployed a dynamic, client-centric website using HTML, CSS, JavaScript, and MySQL; seamlessly integrated custom frontend with theme-based backend.
- Customized and extended Material UI themes to deliver fully responsive, cross-browser-compatible user interfaces.
- Collaborated on backend logic design and implementation, enhancing site functionality and optimizing user experience.

Tata Consultancy Services
System Engineer

Nov 2024 – Present

- Developed and maintained a high-traffic pharmacy application for a major nationwide Canadian retail pharmacy chain.
- Designed and developed RESTful APIs using Spring Boot with a layered architecture (Controller, Service, DAO) to improve modularity and maintainability.
- Implemented concurrency controls using Spring annotations and database transaction isolation levels to ensure thread-safe access to critical modules.
- Diagnosed and resolved backend issues affecting data consistency and integrity; refactored business logic to enable seamless user workflows.
- Utilized MySQL for data persistence, developing optimized SQL queries and schema modifications to enhance application performance.

Projects

iNotebook

Nov 2023

- Developed** a full-stack note-taking application using React.js and Express.js, Node.js, MongoDB, increasing user satisfaction by **60%**.
- Streamlined** note management with efficient CRUD operations, reducing processing time by **25%** and boosting user productivity.
- Engineered** robust user authentication system with secure login/signup, decreasing potential security breaches by **80%**.
- Implemented** email notifications, automatically sending note copies to users' registered email addresses.

Linkedin Clone

Sep 2025

- Architected LinkedIn-inspired microservices platform using Spring Boot, Java, PostgreSQL, and Neo4j Graph DB; integrated Eureka Discovery Server and API Gateway for scalable inter-service communication via Feign Clients across 5 services (User, Connection, Post, Notification, API Gateway).
- Engineered Neo4j Graph DB-powered social connection system to model and query 1st-degree connections; supported real-time requests, acceptances, and rejections with sub-millisecond relationship traversals at scale.
- Implemented event-driven notifications with Apache Kafka to deliver real-time alerts (e.g., post likes, connection requests) across services; decoupled producers and consumers for high availability and fault tolerance.
- Developed custom distributed security layer using FeignClientInterceptor, UserContextHolder, UserInterceptor, and WebConfig to securely propagate authenticated user context across microservices; managed JWT-based login and signup via dedicated User Service.
