

Education

• Thapar Institute of Engineering & Technology (TIET)

B.E in Computer Science and Engineering;

◦ **Courses & Electives:** Data-Structures and Algorithms, Operating Systems, Database Management System, Object-oriented Programming, Full Stack

Punjab, India

July 2020 - Present

Experience

• Pinnacleway Biz Solutions Private Limited

Full Stack Engineer(Intern)

- Built and deployed a dynamic, client-focused website using PHP, HTML/CSS, and MySQL, integrating a custom frontend with a theme-based backend.
- Customized and extended pre-built UI themes from ThemeForest to create responsive, cross-browser-compatible user interfaces.
- Collaborated in the design and implementation of backend logic, enhancing site functionality and improving user experience.
- Conducted research and development on IoT technologies, exploring data acquisition methods and system integration for future use cases.

Gurugram, India

• Tata Consultancy Services

System Engineer(Full Time)

- Contributed to the development and maintenance of a high-traffic pharmacy application used nationwide by a major Canadian retail pharmacy chain.
- Designed and developed RESTful APIs using Spring Boot, following a layered architecture (Controller, Service, DAO) to ensure modularity and maintainability.
- Implemented concurrency control mechanisms to handle synchronized access to critical modules, utilizing both Spring-level annotations and database transaction isolation.
- Diagnosed and resolved backend issues related to data consistency and integrity; refactored business logic to ensure seamless user workflows.
- Utilized MySQL for data persistence, writing optimized SQL queries and performing schema modifications to improve application performance.

Noida, India

Nov 2024 – Present

Projects

iNotebook [GITHUB](#) [LIVE](#)

- Development of a note-taking app, using React JS for frontend and Express JS, Node JS, and MongoDB for backend, resulting to increase 60% user satisfaction.
- Streamlined user note management system by implementing efficient CRUD operations, reducing processing time by 25% and enhancing overall user productivity.
- Engineered and launched a state-of-the-art user authentication system, develop the login and signup pages to protect user’s sensitive information; achieved 80% decrease in potential security breaches.

UberClone [GITHUB](#)

- Developed full-stack Uber clone using Spring Boot and PostgreSQL, implementing RESTful APIs for ride-hailing with JWT authentication and role-based access control
- Integrated PostGIS spatial database with JTS geometry for real-time geolocation tracking, enabling efficient driver matching.
- Implemented Strategy pattern for dynamic pricing and driver matching, including surge pricing (2x multiplier) and nearest driver algorithms to optimize ride allocation
- Built comprehensive payment system with Strategy pattern supporting wallet and cash payments, featuring transaction management and wallet balance updates

Certificates

• Certificate of Completion – Data Structures in JAVA by Coding Ninjas – August, 2023

• Certificate of Excellence – Introduction to JAVA by Coding Ninjas – July, 2023

• AWS Academy Graduate – AWS Academy Introduction to Cloud Semeter 1 - November, 2022

• Postman API Fundamentals Student Expert

Skills Summary

• Languages: Java, C, Python, JavaScript, TypeScript

• Frameworks: Bootstrap, React JS, Vue JS, Spring Boot

• Tools: Git, Linux, , IntelliJ

• Database: Oracle SQL, MongoDB, Firebase, DB2, PostGreSQL, MySQL
